OKD-111 failed to reach target and is not reported herein.

OKD-112: the intercept reported in Shear 4 had >50% core loss.

The intercepts reported are down-hole widths. True widths of holes 111 to 116 vary between 56% and 94% of reported down-hole widths. Weighted average grades are calculated based on un-capped gold assays, as insufficient drilling has been completed to determine capping limits for gold assays.
